[Consent to Access Port WA Narrows 041817.pdf](#)
[080812 Consent for Access to Property.pdf](#)

Lindie,

After discussion with Policy it was decided that a revised Consent for Access agreement was the best way to allow EPA and CNG to move forward with implementing the Bremerton Gas Works RI/FS work plan in regards to SOAL. As you will see in document it was revised to clarify that all remedial actions from this point forward will require a use authorization from DNR.

If you have any questions feel free to give me a call.

Subject: Consent for Access for Bremerton Gas Works RI/FS Work Plan

Eva,

I have attached a revised Consent for Access (CFA) agreement that allows Bremerton Gas Works RI/FS work to continue on SOAL. As I stated in my previous email a revision to the current CFA (provided by EPA On-Scene Coordinator, Kathy Parker) is needed now that the 'Emergency Action' phase is complete. This new CFA clarifies what actions, beyond those authorized by this CFA, will require a use authorization from DNR to access SOAL.

Please let me know if any questions.

Subject: RE: Bremerton Gas Works RI/FS Work Plan

Eva,

Thank you for opportunity to comment. The Work Plan is structured appropriately for initial determination of levels of contamination in area of investigation. We understand further investigation beyond this area may be warranted at a later date to understand extent.

The 'Emergency Actions' performed in 2010 and 2012 were conducted under a 'Consent for Access' agreement. We feel it prudent as we enter into the long-term phase of investigation and remediation to revise this agreement to clarify how long-term access and remediation actions on state owned aquatic lands will be managed.

We are drafting a new 'Consent for Access' agreement with updated language. I plan to have this completed and to you in next few weeks. Once you receive we can discuss any questions or concerns you might have.

Hi all-

I wanted to let you know that the almost final Bremerton Gas Works RI/FS Work Plan was submitted February 28, 2017. You can find a link in the first attachment and some corrections and the RTC in the second attachment. EPA plans to submit our comments in early April. Please let me know if you have any questions or concerns by COB April 7. Thank you.

Eva

Subject: Bremerton Gas Works Superfund Site Update

Greetings Everyone-

It's been quite some time since I've updated you on activities related to our investigation of the Bremerton Gas Works Superfund site. Since my last update, our efforts to develop a work plan to define our investigation of the site encountered a few delays. With those delays behind us now, we are working to finalize the work plan. It will

describe the approach that will be used to guide sampling activities and develop possible cleanup strategies. The work plan will reflect input some of you provided to EPA based on your review of the draft work plan. We anticipate that this plan will be finalized sometime in early 2017, with field activities starting soon thereafter. Once completed, we will make the plan available to you.

On a more personal note, I want to let you know that I will be (b)(6) and that my project manager responsibilities are being placed in the capable hands of Eva DeMaria, who is located in our Seattle office. Eva can be reached by email at demaria.eva@epa.gov<mailto:demaria.eva@epa.gov> and by phone at 206-553-1970. Her mailing address is the same as mine, which is presented below. Please direct your future communications about the site to Eva, or Debra Sherbina, our Community Involvement Coordinator for the site.

It's been a pleasure working with you all.
